Infinity Legal Platform

COMPREHENSIVE PLATFORM PRESENTATION

A next-generation legal tech SaaS platform for the South African market — featuring AI-powered intake, case management, document versioning, leads pipeline, and enterprise-grade compliance.

SOUTH AFRICA • POPIA COMPLIANT • AI-POWERED

March 2026 • Version 2.0 • Confidential

SECTION 01

Executive Summary

Platform capabilities, market positioning, and key differentiators

15+	6	50+	R95
Portal Modules	AI Features	API Endpoints	Starting Price/mo

Platform Modules

- ✅ Dashboard with real-time stats, cases, notifications
- ✅ Case Management with full lifecycle tracking
- ✅ AI Intake — GPT-powered legal analysis & case creation
- ✅ Document Versioning with check-in/out & workflow
- ✅ Leads Pipeline with qualification & conversion
- ✅ Task Management linked to cases
- ✅ Calendar with court date tracking
- ✅ Messaging (internal & client)
- ✅ Knowledge Base for legal research
- ✅ HR Module & Staff Management
- ✅ Billing & Time Tracking
- ✅ Case Archiving for compliance
- ✅ RBAC with 12+ granular roles

Competitive Advantages vs Scorpion.biz

🤖 AI-Powered Legal Intake

GPT-4o analyses client problems in real-time, categorises legal matters, suggests next steps, and auto-generates cases. Scorpion has no AI capabilities.

📋 Document Version Control

Full version history, check-in/out locking, and workflow approval (Draft → Review → Approved → Signed). Enterprise-grade document management.

🔐 POPIA Compliant by Design

End-to-end encryption, role-based access, audit logging, and privilege protection built into every module.

SECTION 02

Public Website

Consumer-facing legal protection marketplace modeled after Scorpion.biz

Hero Section

"Legal Protection That Fights For You" — AI-powered legal help, POPIA compliant, from R95/month. Stats: 500+ attorneys, <5min response, 95% satisfaction, 24/7 help line.

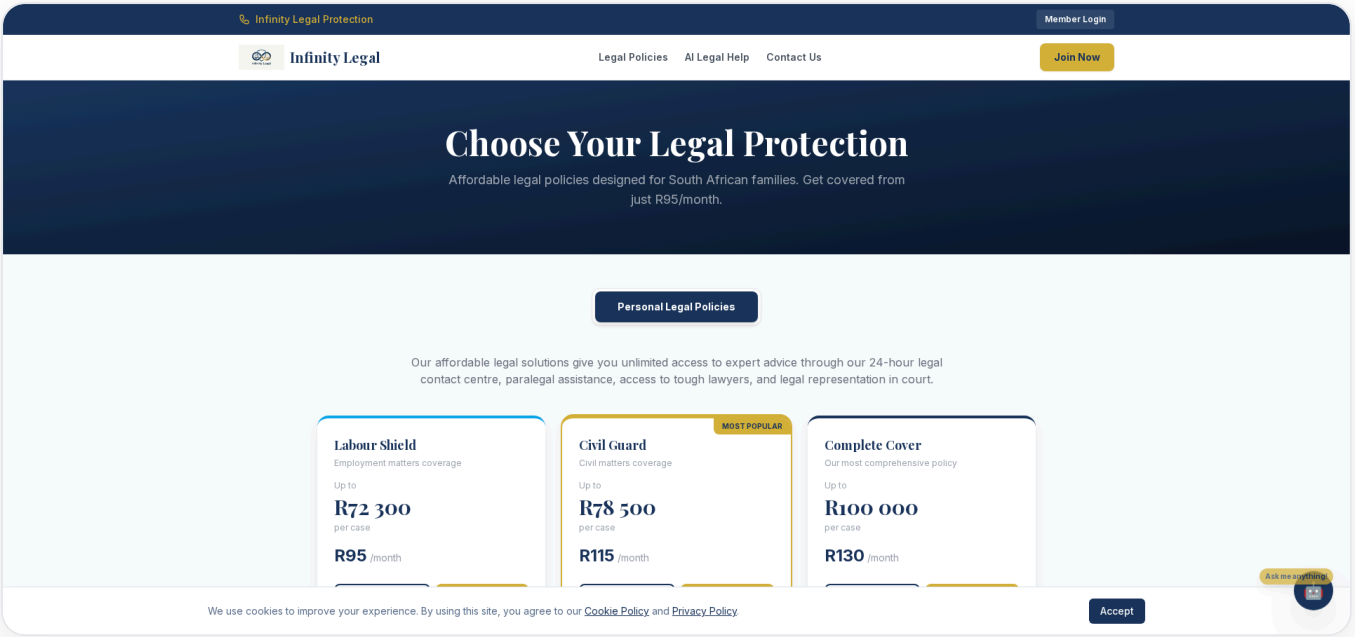
Navigation

Legal Policies, AI Legal Help, Legal Resources, Contact Us, Member Login, Join Now. Clean, accessible, mobile-responsive design.

SECTION 03

Pricing Plans

Three-tier legal protection: Labour Shield, Civil Guard, Complete Cover



Labour Shield — R95/mo

Employment matters coverage up to R72,300. CCMA representation, disciplinary hearings, retrenchment advice.

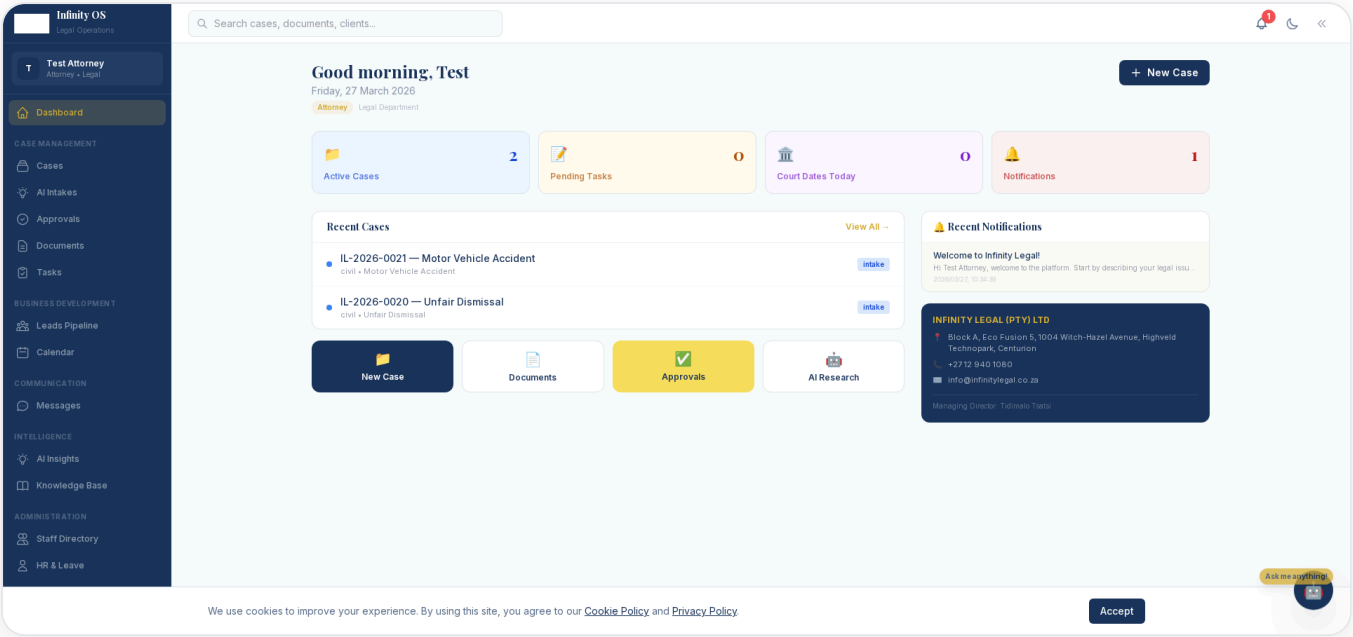
Civil Guard — R150/mo MOST POPULAR

Civil matters coverage up to R78,500. Consumer disputes, debt recovery, property matters, contractual disputes.

SECTION 04

Staff Portal — Dashboard

Personalized workspace with real-time metrics and quick actions



At-a-Glance Metrics

Active Cases, Pending Tasks, Court Dates Today, Notifications. Role-aware greeting with department info. Recent cases with status badges.

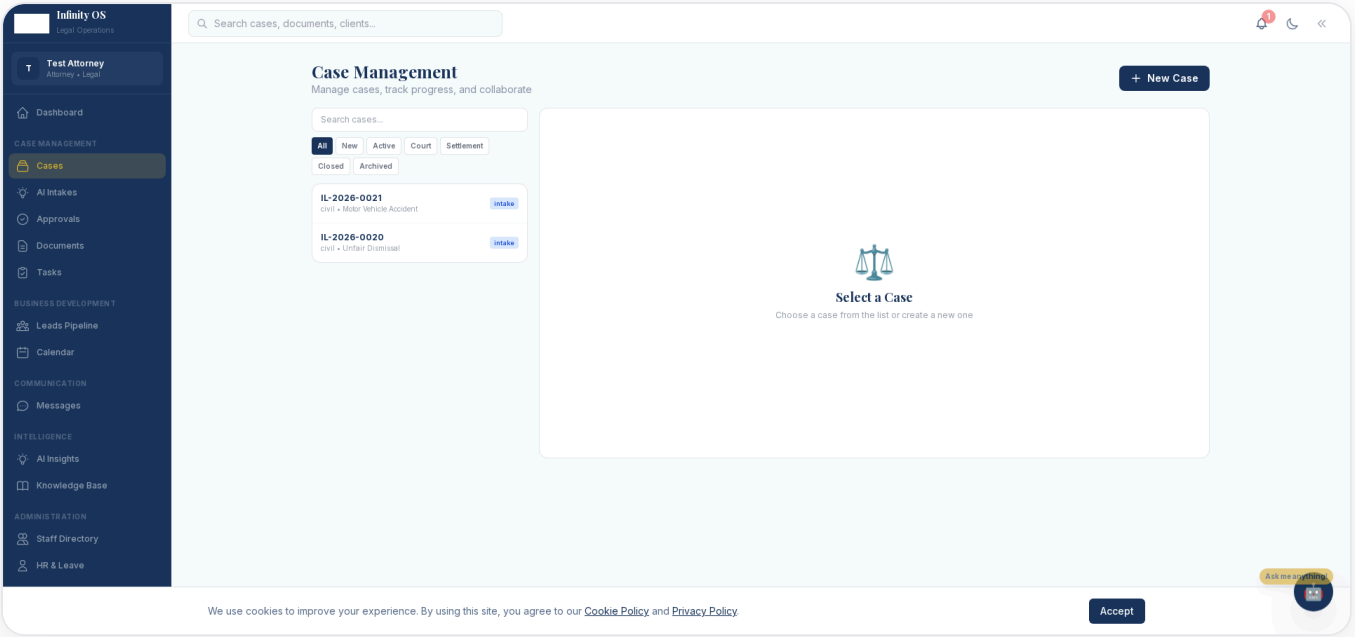
Quick Actions

New Case, Documents, Approvals, AI Research — one-click access to the most common workflows. Company info panel with MD details.

SECTION 05

Case Management

Full lifecycle: New → Active → Court → Settlement → Closed → Archived



Case Workspace Tabs

Timeline, Notes, Tasks, Messages, Billing, Details — complete case management in a single view. Search and filter by status, type, case number.

🗄️ Case Archiving (NEW)

Closed cases can be archived for compliance. Archived cases become read-only. Auto-archive for cases closed >30 days. Full audit trail preserved.

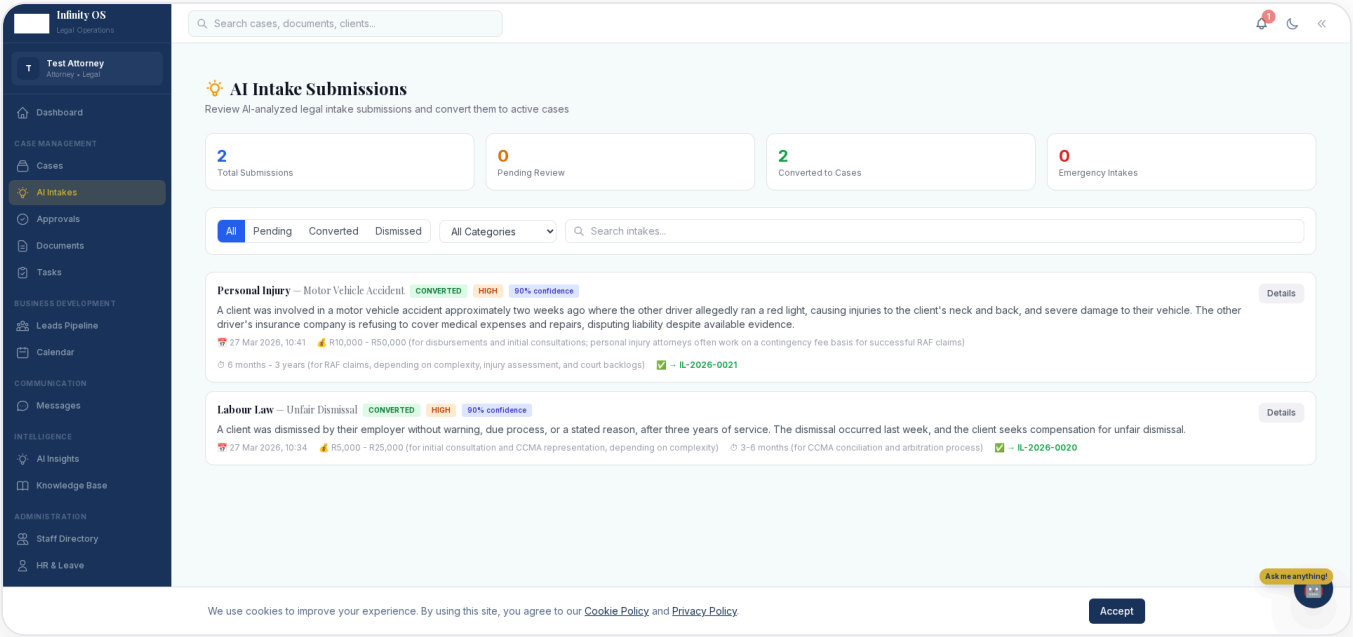
Prescription Period Tracking

South African prescription periods are auto-calculated (CCMA 6mo, Unfair Dismissal 12mo, General 3yr, Property 30yr). Visual badges warn when deadlines approach.

SECTION 06

AI Intake → Case Conversion

GPT-4o powered legal analysis with one-click conversion to active cases



🤖 AI Legal Analysis

Client describes their problem → AI categorizes (Labour, Criminal, Family, etc.), identifies urgency, suggests next steps, relevant legislation, cost estimates, and timeline.

Convert to Case

Attorneys review AI analysis and convert intakes to active cases with one click. AI analysis is saved as a case note. Duplicate protection prevents double conversion.

POST `/api/intake/analyze — AI analyzes legal problem (saves to MongoDB)`

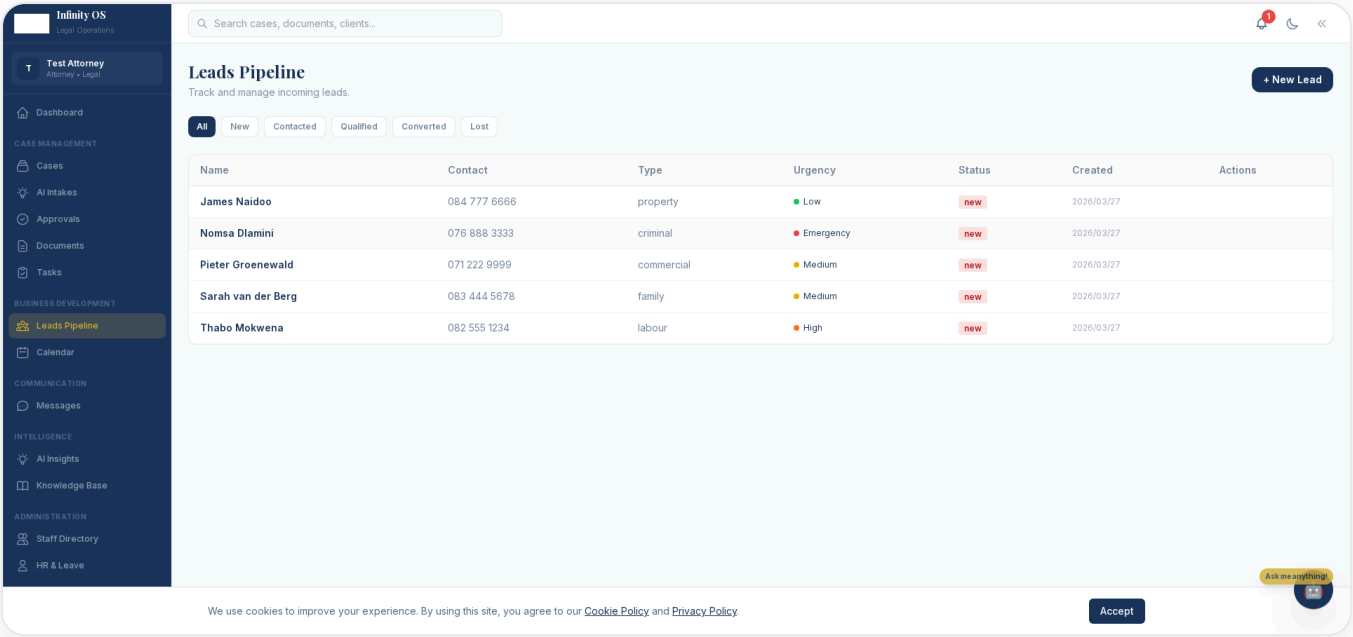
GET `/api/intakes — List submissions with status/category/search filters`

POST `/api/intakes/{id}/convert — Convert intake to case (Supabase + MongoDB)`

SECTION 07

Leads Pipeline

Full lead lifecycle: New → Contacted → Qualified → Converted → Lost



Lead Management

Create leads from web inquiries, referrals, walk-ins, or phone calls. Track urgency (Emergency → Low), case type, and source. Full CRUD with MongoDB backing.

Pipeline Workflow

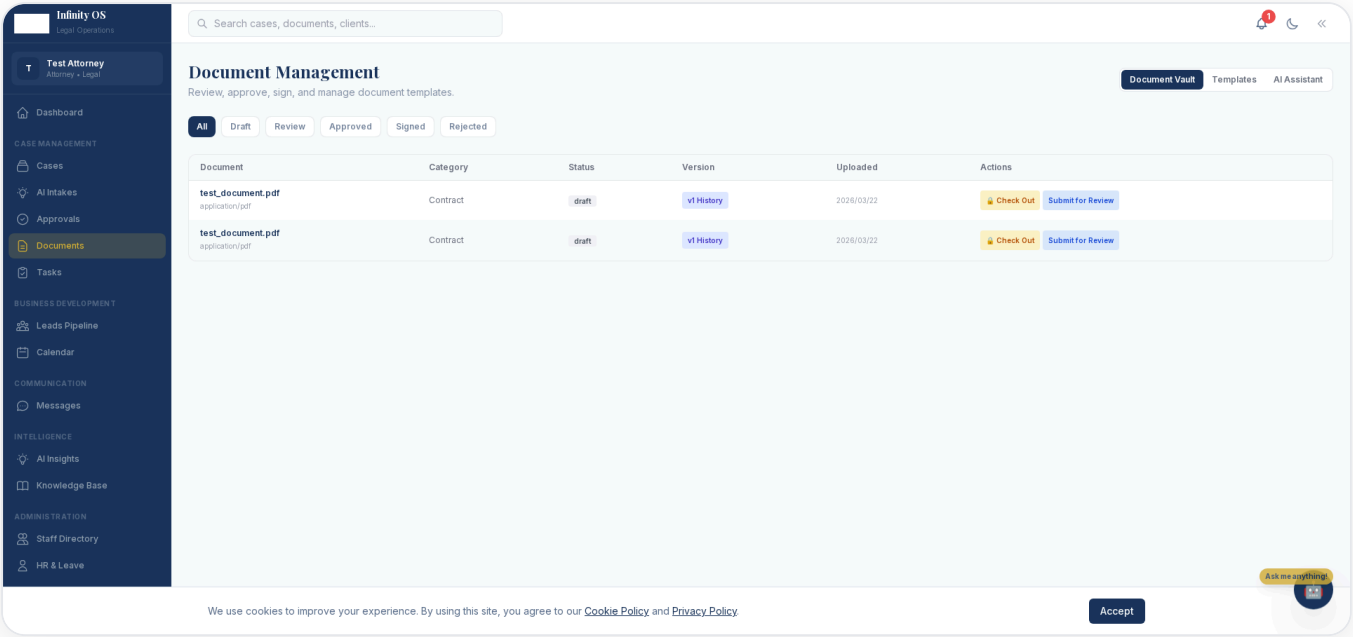
Qualify → Assign to Paralegal (24hr SLA) → Ready for Strategy → Assign to Officer (48hr SLA) → Convert to Case. Notifications at each stage.

```
GET  /api/leads — List leads with status/search filters
POST /api/leads — Create new lead (name, email, phone, source, type, urgency)
PUT  /api/leads — Update lead (qualify, contact, assign, convert, lost)
```

SECTION 08

Document Management & Versioning

Enterprise-grade document workflow with version control and check-in/out



📋 Version History (NEW)

Full version tracking for every document. Upload new versions with change notes. View complete history with timestamps and author attribution.

🔒 Check-in / Check-out (NEW)

Lock documents while editing to prevent conflicts. 4-hour auto-expiry. Only the lock holder can upload new versions. Prevents overwrite conflicts.

📄 Workflow Approval

Draft → Review → Approved → Signed. Only Legal Officers can approve and sign. Paralegal UPL protection enforced.

🤖 AI Document Assistant

AI-powered document review, drafting suggestions, and legal research. Built-in templates for common SA legal documents.

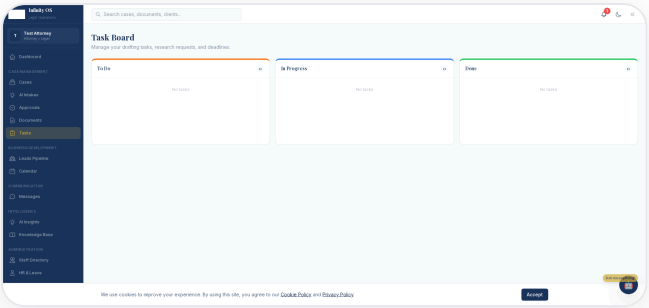
```
GET  /api/documents/{id}/versions — Get version history
POST /api/documents/{id}/versions — Upload new version
GET  /api/documents/{id}/lock — Check lock status
POST /api/documents/{id}/lock — Check out / Check in
PUT  /api/documents/{id}/workflow — Transition workflow status
```

SECTION 09

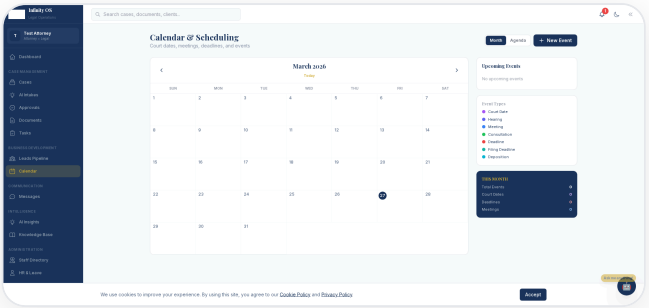
Additional Modules

Tasks, Calendar, Knowledge Base — supporting the complete legal workflow

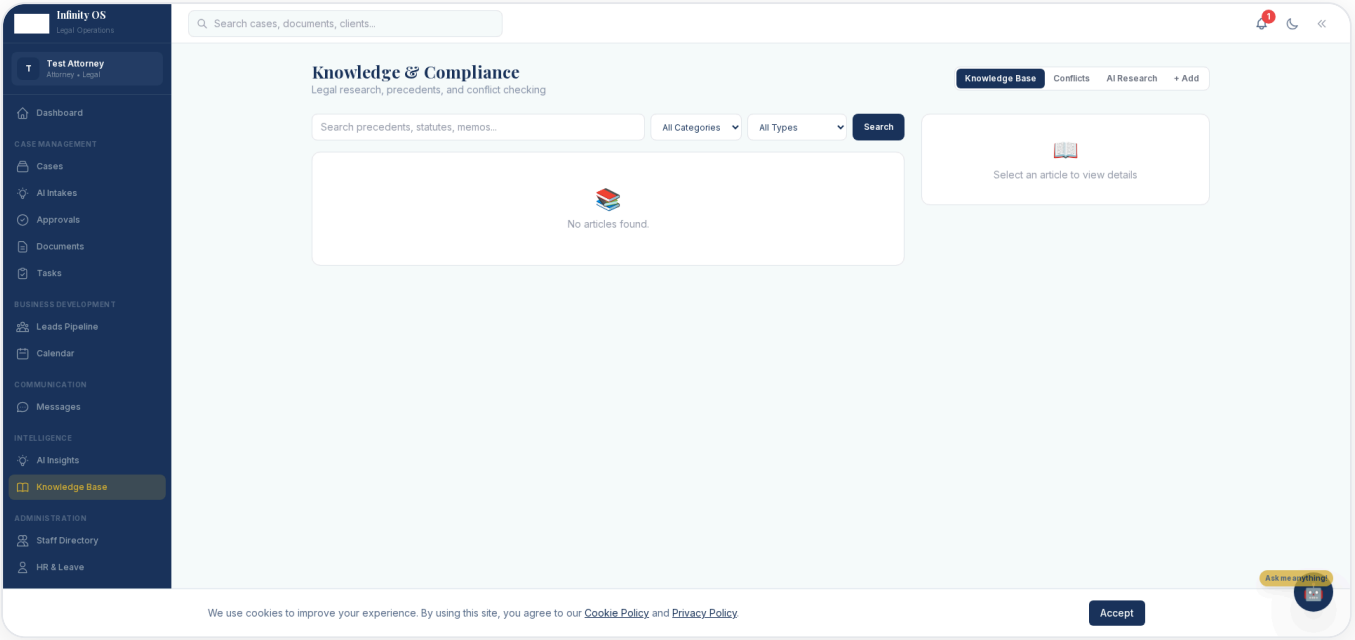
📋 Tasks



📅 Calendar



📚 Knowledge Base



SECTION 10

Technical Architecture

Modern, scalable, production-ready technology stack

Next.js 14
App Router, SSR, API Routes

MongoDB
Documents, Leads, Intakes, Versions

Supabase
Auth, Users, Cases, RLS

GPT-4o
Legal Analysis, Document Assist

Tailwind CSS
Responsive, Dark Mode

RBAC System
12+ Roles, 30+ Permissions

Security & Compliance

POPIA compliant data handling. Role-based access control (RBAC) with 12+ roles. Audit logging for every action. Encrypted data at rest and in transit. Middleware-enforced authentication.

Production Readiness

Health check API (/api/health). SEO optimized (sitemap.xml, robots.txt, JSON-LD). Analytics tracking. Custom 404 page. Cookie consent. Hot reload development.

API Architecture — 50+ Endpoints

RESTful API design. Auth via Supabase JWT tokens. Rate limiting. Error handling with proper HTTP status codes. MongoDB for flexible document storage. Supabase for relational data with RLS policies.

SECTION 11

Roadmap & Next Steps

Upcoming features and strategic direction

✅ Completed (This Release)

- AI Intake → Case conversion
- Document versioning & check-in/out
- Leads pipeline (MongoDB-backed)
- Case archiving (read-only mode)
- Tasks bug fix (Supabase column)
- RBAC enhancements for attorneys
- Scorpion.biz competitive redesign
- Production readiness (health, SEO, analytics)

🔵 Upcoming

- PayFast payment integration
- Client self-service portal
- Advanced reporting & analytics dashboard
- Email/SMS notification integration
- Mobile responsive portal enhancements
- Multi-language support (ZA languages)
