07	Staff Portal (Intranet)	Case management, calendar, billing, HR, documents, messaging, knowledge base
08	Case Management Workspace	Timeline, notes, tasks, messages, billing, documents — per case
09	Backend API Architecture	All API endpoints, MongoDB collections, data flow
10	Production Readiness	SEO, monitoring, analytics, backup, security

Platform Architecture

A modern full-stack application built with Next.js 14, powered by dual databases and AI integration.

Next.js 14
Frontend + API Routes

Supabase
Auth + PostgreSQL

MongoDB
Enterprise Data Store

AI/LLM
GPT-4o Integratio

Technology Stack

Frontend
Next.js 14 App Router, React 18, Tailwind CSS, shadcn/ui components, Recharts for analytics

Authentication
Supabase Auth with PKCE flow, 20+ role types, granular permissions, middleware protection

Databases
Supabase PostgreSQL (auth/core), MongoDB (enterprise features, case workspace, analytics)

Key Metrics

15+ Pages
Public website, portal modules, auth pages, legal compliance pages

25+ API Endpoints
RESTful APIs for cases, billing, calendar, HR, documents, messaging, knowledge, analytics

20+ Roles
Managing Director, Senior Partner, Associate, Attorney,

Paralegal, Client, and more

Public-Facing Pages

Professional, conversion-optimized pages modelled after industry leader Scorpion Legal Protection — adapted for Infinity Legal's brand and pricing.

PAGE	URL	PURPOSE	STATUS
Homepage	/	Hero, policies, contact, referral, AI chatbot CTA	✅ Live

Terms of Service	/terms	Legal terms & conditions	✅ Live
Privacy Policy	/privacy	POPIA-compliant privacy policy	✅ Live
Custom 404	/*	Branded 404 page with navigation options	✅ Live

Homepage Sections (Scorpion-Style)

- ✓ Top bar with brand identity + Member Login
- ✓ Sticky navigation: Legal Policies, AI Legal Help, Legal Resources, Contact Us, Join Now

- ✓ Bold hero: "Legal Protection That Fights For You" + hero image + stats
- ✓ Expandable pricing cards with Read More / Close toggle
- ✓ "Why Join Infinity Legal?" persuasion section
- ✓ Referral Rewards banner
- ✓ AI Legal Sidekick section
- ✓ Legal Resources grid (Articles, Templates, FAQs, Claim Forms)
- ✓ Multi-channel Contact (AI Help, WhatsApp, Email, Help Centre)
- ✓ Online Query form with enquiry type dropdown
- ✓ Professional footer with quick links + legal links

Legal Protection Policies

Three tiers of affordable legal protection designed for South African families and individuals.

Labour Shield

Employment matters coverage

R95/month

Up to R72,300 per case

- Employment law matters
- R11,000 accidental death benefit
- Free last will & testament
- Tax advice
- 24-hour legal help line

Civil Guard

MOST POPULAR

Civil matters coverage

R115/month

Up to R78,500 per case

- Civil law matters
- R16,500 accidental death benefit
- Free last will & testament
- Tax advice & assistance
- 24-hour legal help line

Complete Cover

Most comprehensive policy

R130/month

Up to R100,000 per case

- Employment + Civil + Criminal law
- R22,000 accidental death benefit
- Divorce & child maintenance
- 20% conveyancing discount
- Legacy Accumulator benefit
- Tax submission services

All Policies Include

👪

Cover for main member, spouse/life partner, and children under 21

📞

24-hour access to experienced legal specialists

💼

Pay no premiums for up to 12 months if retrenched or permanently disabled

Membership Application Wizard

A comprehensive 6-step application process that captures all required information for legal policy onboarding.

1. Personal Details → 2. Service Plan → 3. Dependants → 4. Legal Matter →
5. Banking Details → 6. Declaration

Step 1: Personal Details

Title, full names, ID/passport number, email, cellphone, language preference, postal address

Step 2: Service Plan

Select from Labour Shield (R95), Civil Guard (R115), or Complete Cover (R130)

Step 3: Dependants

Add spouse/partner and children under 21 for family coverage

Step 4: Legal Matter

Describe current legal issue (if any) for immediate assignment

Step 5: Banking Details

Debit order setup for monthly premium collection

Step 6: Declaration

Terms acceptance, POPIA consent, digital signature

AI-Powered Legal Intake

Separate from the application, the AI Intake Wizard allows anyone to get immediate legal guidance.

Select Legal Category → Describe Issue → AI Analysis (GPT-4o) → Legal Guidance →

9 Legal Categories: Criminal Law, Family Law, Labour Law, Personal Injury, Property Law, Debt Recovery, Civil Litigation, Commercial Law, Other/Not Sure

Staff Portal Modules

A comprehensive internal portal accessible only to authenticated staff members. Protected by Supabase Auth + RBAC middleware.

Case Management

Create/manage cases, auto-generated Matter Numbers (IL-YYYY-NNNN), status workflows, tabbed workspace

Calendar

Firm-wide calendar, court dates, meeting scheduling, appointment management

Billing

Invoice creation, payment tracking, billing rate management, financial reporting

HR & Leave

Leave requests, approval workflows, staff directory, department management

Documents

Document management, templates, AI-assisted drafting, review workflows

Messaging

Internal messaging, conversations, unread tracking, announcements

Knowledge Base

Legal precedents, statutes, research memos, conflict checking

Reports

Cross-module analytics, case statistics, billing summaries, staff productivity

Settings

Notification preferences, profile management, firm configuration

Case Workspace (Module 2)

Each case has a comprehensive tabbed workspace for managing all aspects of legal matters.

Timeline

Chronological event feed. Auto-generated entries for case creation, note additions, task completions, and messages.

Notes

Internal attorney notes with categories: General, Strategy, Research, Client Update, Court Prep. Staff-only access.

Tasks

Case-specific task management with priorities (Low/Normal/High/Urgent), due dates, and status tracking.

Messages

Case communication log with internal/external flag. Supports attorney-only messages.

Billing

Time entries, budget tracking, billing rates, resource management per case.

Details

SA prescription periods, milestones, case metadata, assignment history.

Case Workflow

New → Active → Pending Court → In Review → Resolved → Closed

Matter Number Format

IL-YYYY-NNNN

Auto-generated sequential matter numbers. Example: **IL-2026-0001**

IL = Infinity Legal, YYYY = Year, NNNN = Sequential number (zero-padded)

API Endpoints

RESTful API routes built with Next.js App Router. All endpoints prefixed with /api/.

ENDPOINT	METHODS	AUTH	DESCRIPTION
/api/cases	GET, POST	✅	List/create cases with auto Matter Numbers
/api/cases/[id]/timeline	GET, POST	✅	Case timeline events
/api/cases/[id]/notes	GET, POST	✅ Staff	Internal attorney notes
/api/cases/[id]/tasks	GET, POST, PUT	✅	Case task management
/api/cases/[id]/messages	GET, POST	✅	Case communications
/api/cases/[id]/assign	PUT	✅ RBAC	Attorney assignment
/api/cases/[id]/metadata	GET, POST, PUT	✅	Prescription, resources, milestones
/api/calendar	GET, POST, PUT, DEL	✅	Calendar events
/api/billing	GET, POST	✅	Invoices and billing
/api/hr	GET, POST, PUT	✅	Leave management
/api/documents	GET, POST	✅	Document management
/api/messages	GET, POST	✅	Internal messaging
/api/announcements	GET, POST, DEL	✅	Firm announcements
/api/knowledge	GET, POST	✅	Knowledge base
/api/ai/document-assist	POST	✅	AI document review/draft
/api/ai/case-insights	POST	✅	AI case strategy/risk
/api/health	GET	❌	System health check

/api/analytics	GET, POST	Mixed	Privacy-compliant analytics

Production Checklist

Comprehensive production readiness measures implemented across the platform.

SEO & Structured Data

JSON-LD LegalService schema, OpenGraph tags, Twitter Cards, auto-generated sitemap.xml with 17 pages, robots.txt blocking private routes & AI crawlers

Monitoring & Health

GET /api/health endpoint checking MongoDB, Supabase, env vars, memory usage. Error logging to MongoDB. Uptime monitoring ready.

Analytics (POPIA Compliant)

Privacy-first analytics — no cookies, no IP tracking, no fingerprinting. Page views stored in MongoDB. Admin dashboard via GET /api/analytics.

Security Headers

CSP, HSTS, X-Frame-Options: DENY, XSS Protection, Referrer-Policy, Permissions-Policy. RBAC on all API endpoints.

Backup Strategy

Supabase: automatic daily backups + point-in-time recovery. MongoDB: mongodump scheduled backups. Monthly restore testing.

Rollback Plan

Emergent platform version history for code. Supabase PITR for PostgreSQL. MongoDB backup restore for enterprise data. Documented procedures.

Error Handling

Database Indexes

Custom 404 page with navigation. Global error boundary. Error.js with retry. Client errors logged to /api/analytics.

14 MongoDB indexes created for optimal query performance across all collections (timeline, tasks, analytics, etc.)

Environment Validation

Startup validation ensures all required environment variables are configured — no hardcoded defaults in production. The /api/health endpoint validates on every request.

Required: MONGO_URL, DB_NAME, NEXT_PUBLIC_BASE_URL, SUPABASE_URL, SUPABASE_ANON_KEY, SUPABASE_SERVICE_ROLE_KEY

THANK YOU
